Title: Imagine a world without ageism

- Table 1: Summary of the results per comment;
- [Table 2](#): Summary of the results per sociolinguistic variable;

Table 1: Summary of the results per comment

Comment	KeyWords	Sociolinguistic variables (Hiper - Hipo)	Hate Speech Frequency	Hate Speech Fre-quency(%)
I don't like it when old ppl call me young lady	Old	Age - Over 65s	1/11	9.091
Great video. Examples of ageism I've witnessed include (1) much younger people addressing older people as "Honey" or "Sweetie", (2) using baby talk or high-pitched voices, or (3) talking to family members or others about an older person (instead of to that older person directly) when that older person is present.	Ageism	Age - General	1/51	1.961
Thank you for the video. As a 71 years young passionate person I believe that ageism in Australia does not go far enough and that some of the issues raised are ignored by older adults themselves. In this regard, consciousness, spirituality [non-religious] creativity, mindfulness embracing challenges of growth and eventual phase known as 'death,' should be a part of the broader conversation and involvement.	Ageism	Age - General	1/64	1.562

Table 2: Summary of the results per sociolinguistic variable

Sociolinguistic variables (Hiper - Hipo)	KeyWords	Number of occurrences	Frequency	Frequency(%)
Age - Over 65s	Old	1	1/299	0.33
Age - General	Ageism	2	2/299	0.67

Result analysis:

- Taking into account the words that were detected, we can reach the conclusion these comments are associated with : : Age - Over 65s;Age - General;
- The percentage of hate speech related words is 1.0033.
- Considering that the variable **Age - General** has the most occurrences in the post, we can interpret that this is the predominant hate speech.
- Overall there were 3/6 occurrences of hate speech related comments.
