Title: Students Pranked During Teacher’s Lesson on Ageism | Field Tripped

- Table 1: Summary of the results per comment;
- [Table 2](#): Summary of the results per sociolinguistic variable;

Table 1: Summary of the results per comment

Comment	KeyWords	Sociolinguistic variables (Hiper - Hipo)	Hate Speech Frequency	Hate Speech Fre-quency(%)
There is no doubt that teacher are targeted with PAR by administration because of their age . Where I live, we can’t even get ahold of the PAR data, but we know PAR is ageist . You can see the data if you click here and scroll down: [LINK]	Age, Ageist	Age - General	2/47	4.255
5:58 well luckily you still look young. Also the old teacher was boring.	Old	Age - Over 65s	1/13	7.692
Moral of the story: ”Supposed youth ageism and discrimination is solved with.... skin moisturizer!”	Ageism	Age - General	1/14	7.143

<p>I'm 70 and I can tell you ageism IS a thing. Once you hit like 40, you are OLD. I remember I was out shopping when I was 40. I was looking at kids clothes...my daughter was 4 and my son was 7, but they weren't with me. A lady shopper near me looked over and said "Are you a grandmother?" I was totally flabbergasted! How in the world could she think that? It then occurred to me that, in fact, I could be a grandmother at 40. What a wake up call. I was carded for real until i was 35, so this just threw me for a loop. At my current age, younger people always seem to assume I'm senile and set in my ways. Come on! I have kept myself in shape and I keep up with current clothing trends (although I do go for looks that would suit a 30 year old and not a teen). I'm on Facebook, Twitter, Pinterest and Instagram. I have been playing Pokemon GO since it came out, and I used to be in Second Life. In other words, I think young. My Great Aunt used to wear orthopedic shoes and house dresses...typical old lady clothes...I swore I would never look like that, and I don't. I think I relate to younger people. I have a 5 year old Granddaughter, and I hope when I die, she won't remember me as this old lady...in fact, I hope she will say "WOW, she was too young to die". I'm afraid ageism isn't going away, but maybe if people will start giving someone a chance before making assumptions, that would be a start.</p>	Age, Ageism, Old	Age - General, Age - Over 65s	8/280	2.857
<p>I also think that students tend to like substitutes that they see as "easy." When my students tell me they loved the substitute they had I always ask them why. Their response is pretty much the same every time: "he/she let us do ." Of course, I don't know the students' motivations in this class, but just an observation from my own experience. I also agree with the top commenter, that if it were a real experiment, the teachers would have had the same lesson. Then you really test if age played a factor.</p>	Age	Age - General	1/94	1.064
<p>It's not ageism. It's because students are not in school to learn, they're there to socialize, they're stupid. So in turn they want to stupid person 'teaching' them so they don't have to do work.</p>	Ageism	Age - General	1/35	2.857
<p>Ageism is a real thing, this has already been studied Love the concept of exploring it within a class context, but do it with accurate questions in mind! It's equally important to teach viewers about setting up an scientifically plausible premise</p>	Ageism	Age - General	1/43	2.326
<p>This experiment doesn't work correctly. Because the younger teacher approached the students with something they could relate with, tv shows, and asked them to interact. Where the older teacher told them to read definitions and watch videos. I find that teachers (no matter their age) who interact with their students, will always get a much better student response.</p>	Age	Age - General	1/58	1.724

I'm in college myself so I understand why they picked Mr. B. Not because of his age , but because he was the "easier" sub. That said, Mr. Paul's plan sounded significantly more interesting to me.	Age	Age - General	1/35	2.857
HORRIBLE experiment. If 'age' is the independent variable everything else needs to be the same. You're assuming that students are picking based on the best lesson when they actually have other motivations. Dumb , boring experiment.	Dumb	Physical Identity - Physical (and Mental) Impairments	1/35	2.857
Age and that which goes with it, is the independent variable. The lesson plan was designed to showcase the individual, their age and their strong suits, which is exactly the point of the experiment. But they were both discussing/teaching/talking about sociopaths and psychopaths, which is as close as you possibly can get. You can't have a social experiment where one person is the same as the other based on age , ability and what goes with that, when people are drastically different ages. This experiment cannot be done in a math class where they could have taught the same material, with the same lesson plan, etc, for a result because this is not a math class... he is not a math teacher. Therefore it will not be taught the same way because it will not be a straight forward, this and this will give you this result, instruction of the material.	Age	Age - General	3/150	2.0
I sure am glad white people founded and built a nation for these people to enjoy. All of that white blood was worth it, that way latrineos, blacks and asians can live in a nice country.	Nation	Nationality - General	1/36	2.778
Oh right I forgot, this is the future now so I have to believe that everyone else founded and built the nation now.	Nation	Nationality - General	1/23	4.348
If you don't want to be a minority in your own nation you should just leave. Also that statement that there are plenty of places is simply false, all white nations world wide are being given away just like the USA.	Nation	Nationality - General	1/41	2.439
A. I don't know how this applies to anything in the video, but okay. B. This has never been a "white nation ." Did you forget about all the brown people who were already living on this land when boats full of white people docked on its shores?	Nation	Nationality - General	1/47	2.128
This has nothing to do with age tho..	Age, Nothing	Age - General, Age - Youngsters	2/8	25.0

Had nothing to do with ageism in my opinion. It was more about who the students thought was going to be an easy A and who they could get away with stuff. With the older more experienced gentleman, they knew it was going to be a real class with real work. This generation tends to be more lazier than past. I think the experiment question would have been better phrased as, "Who would be the better teacher". That would have been a true test.	Ageism, Nothing	Age - General, Age - Youngsters	2/84	2.381
Of course it's an easy A....and to a degree ageism is a part of it, however the bigger part of it is the top heavy administration issues we're having (in higher ed particular...as a professor for over 18 years, the issue is within admin). The issue is with how they utilize adjuncts within the classroom (which is what I've been, as full time jobs are hard to get). Why pay full time wages when you can get people to work for 2k/semester. Until that's fixed, we won't see changes.	Ageism	Age - General	1/89	1.124
I see where you're coming from, as I too have taught for 20 years... but as far as this video, my opinion still stands. It's not about ageism . This is about lazy students and who they think is going to be an easier teacher. Nothing more, nothing less.	Ageism, Nothing	Age - General, Age - Youngsters	3/48	6.25
I remember how I used to think in highschool. I would have picked the younger teacher not because of his age , but in order to get high marks with much less effort and be able to be laid back in classes and learn less. I don't think age is a key element in this experiment! Try again with making older teacher give them easy tasks in stead!	Age	Age - General	2/67	2.985
That's the point, based on experience and the ageism , their structure of teaching the material will inherently be different because they have developed the tools and ideas to teach more effectively. This comment is the basis, and the proof, of an ageism experiment with this exact same result.	Ageism	Age - General	2/48	4.167

Table 2: Summary of the results per sociolinguistic variable

Sociolinguistic variables (Hiper - Hipo)	KeyWords	Number of occurrences	Frequency	Frequency(%)
Age - General	Age, Ageist, Ageism	22	22/2092	1.05
Age - Over 65s	Old	6	6/2092	0.29
Physical Identity - Physical (and Mental) Impairments	Dumb	1	1/2092	0.05
Nationality - General	Nation	4	4/2092	0.19
Age - Youngsters	Nothing	4	4/2092	0.19

Result analysis:

- Taking into account the words that were detected, we can reach the conclusion these comments are associated with : : Age - General;Age - Over 65s;Physical Identity - Physical (and Mental) Impairments;Nationality - General;Age - Youngsters;
- The percentage of hate speech related words is 1.7686.
- Considering that the variable **Age - General** has the most occurrences in the post, we can interpret that this is the predominant hate speech.
- Overall there were 37/69 occurrences of hate speech related comments.
