Table 1: Summary of the results per comment

Comment	KeyWords	Sociolinguistic variables (Hiper - Hipo)	Hate Speech Frequency	Hate Speech Fre- quency(%)
I don’t know much about Wales, but in Russia ageism most of all happens to U-18s. NO ONE would trust your opinion if you’re much younger. In any conflict if you are for example 50 years old , and your opponent is 15 y/o, u can always say ”omg, u r too young for this shit and u don’t understand nothing ”. It often happens when it comes to politic discussion, because mostly elderly people watch only TV and don’t use the Internet to check some information. You might know, that TV is 95 controlled by the Russian government, so it makes easier for them to provide news they need. So, as for my country, we should firstly fight against ageism to teenagers, because at the moment, our point of view plays nothing in the life of society.Anyway, thanks to Older People’s Commissioner for Wales for mention this really important topic, because still ageism is one of the most, if not the most widely happened kind of discrimination.From Russia with love.Keep fighting!SayNoToAgeism	Ageism, Elderly, Nothing, Old	Age - General, Age - Over 65s, Age - Youngsters	7/175	4.0

Great video. I loved the graphics.I hate that our culture does not value senior citizens. I wrote a novella series of books where the heroes in the story are elderly . They use 'old school' methods to solve mysteries and catch the bad guys with the help of a ghost and a haunted photograph. At first, the younger adult characters dismiss them because of their age , but learn to respect them in the end. The series is called 'The Haunted Seniors of Specter County'. You can read it for free here if you are interested: [LINK] "Living next door to the local senior center, 10 year-old Henry thought he'd gotten used to the peculiarities and quirks of the retirees. Among the old timers is Sal; a disabled veteran with a talent for finding ingenious uses for ordinary objects, and Phyllis; a hoarder whose colossal handbag is filled with ordinary objects, plus a tiny dog with a knack for locating items within the giant bag. But Henry is about to discover that the lives of the seniors are even odder than they seem. Ghosts linger among the living and the dead live on in photographs. Aided by supernatural forces, Henry and a group of elderly misfits must face danger and overcome the obstacles of advanced age as they struggle to right wrongs and bring justice to criminals."	Age, Disabled, Elderly, Old, Senior	Age - General, Age - Over 65s, Physical Identity - Physical (and Mental) Impairments	8/226	3.54
I was twice asked, in a menacing tone of voice: What's your date of birth?!" by hospital staff on two separate occasions whilst seeking treatment for a broken wrist. I never respond to 'Command and control tactics' ... and ended up going to another hospital where they don't identify people by their date of birth. This use of people's date of birth before asking their name in order to ensure they have the right person is being widely abused in British hospitals by staff who obviously have psychological/mental health issues and take it out on the elderly . Every hospital in the NHS has staff who, in former days, would be given their cards and told to find another profession if they began tormenting the elderly .	Elderly	Age - Over 65s	2/125	1.6
Ageism also happens to younger people .-.	Ageism	Age - General	1/7	14.286
It's not just old people	Old	Age - Over 65s	1/5	20.0

Table 2: Summary of the results per sociolinguistic variable

Sociolinguistic variables (Hiper - Hipo)	KeyWords	Number of occurrences	Frequency	Frequency(%)
Age - General	Ageism, Age	4	4/607	0.66
Age - Over 65s	Elderly, Old, Senior	10	10/607	1.6500000000000001
Age - Youngsters	Nothing	1	1/607	0.16

Physical Identity - Physical (and Mental) Impairments	Disabled	1	1/607	0.16
---	----------	---	-------	------

Result analysis:

- Taking into account the words that were detected, we can reach the conclusion these comments are associated with : : Age - General;Age - Over 65s;Age - Youngsters;Physical Identity - Physical (and Mental) Impairments;
- The percentage of hate speech related words is 2.6359.
- Considering that the variable **Age - Over 65s** has the most occurences in the post, we can interpret that this is the predominant hate speech.
- Overall there were 19/9 occurences of hate speech related comments.
