| It's true though. I literally know reactionary psycho women, who went so deep down the neo-nazi rabbit hole that they think women shouldn't have the right to vote, and believe they themselves are inferior to men.So when a superior male tells her that she's wrong for holding that opinion, suddenly she's smarter than him and is no longer the inferior sex .Conservatives truly are subhuman pieces of trash. | Psycho, Sex | Gender - General, Physical Identity - Physical (and Mental) Impairments | 2/69 | 2.899 |

She was also quite active in supporting a variety of causes, which got her name out there where it is more likely to get picked up by a magazine. | Socialism or Barbarygmoss Any cis woman with well functioning reproductive organs. But if they are willing to give up they're body autonomy to the government, I don't consider them real women. Given that transwoman can't sell her body autonomy to the government like that, so regardless if she votes Democrats or Republicans, she will always be more woman like than cis woman who votes Republicans | Woman | Gender - General | 3/65 | 4.615 |
| 911.Pravda.cz if anything though, wouldn't a trans woman voting a republican into office that will take away certain reproductive rights be abandoning her cis sisters? Not to mention we are on the path of trans people (women at the very least) to getting functional genitals via organ donation. They did it to a cis woman , so it is in the relm of possibility for a trans woman , and by voting republican in that regard is almost just as bad. | Woman | Gender - General | 3/79 | 3.797 |

| Regarding the description, Mr Limbaugh once tried desperately to save a Republican House seat when the incumbent had been caught having a sexual relationship with a male page by lengthy rants about how the Democrats were homophobic (which actually is largely true for completely different reasons if we specify prejudice against the G, but that's a different story).Who the flip thinks Justice G came before Justice O'C? I'll add a Fun Fact I doubt many conservatives know. When the Supremes heard the Casey Martin case, in which a golfer with a birth condition got though Q-school to earn a PGA Tour card and then sued to force the PGA to let him ride in a cart instead of walk the course, Ms O'Connor was the only one among the judges who had ever scored a hole in one.It is true that most of the conservative men I know are quick to mock leftist women's appearance or claim they have all the good looking ones on their side.I remember the video maker as a recurring panelist on To the Contrary, a PBS Sunday-morning pundit programme with an all-female panel that ran about 2.5-1.5 leaning left. The most frequent panelist I can recall was Julianne Malveaux, who was the first person I heard to declare that Mr Gingrich's magnum opus ought to be called the Contract ON America. | Homophobic, Sexual | Gender - General, Sexual Identity - General | 2/229 | 0.873 |

| <p>”to balance things out”. Yep, just like when a magazine features a trans woman once in a long while to balance things out. I do agree that having trans and conservative people in these types of magazines more often would be great instead of creating a standard for themselves (to be fair, this is exaggerated considering that there are more conservative than trans women, this is not meant as direct comparison) however the state can’t determine what they present, in neither case. It isn’t bullying (they aren’t actively misrepresenting you) but you can advocate for them to include more conservative, or trans, models yet it is their choice in the end. The standard represented in these types of media can be hurtful, which is part of some feminist movements when for example advocating for more models of different body types, through the standards they set, which is why it is reasonable to advocate for change in those regards. This can however neither be demanded nor is it legally wrong. The thing that I find even more interesting though is that conservative representation in a strictly visual medium (unless what you advocate for is more interviews with conservatives and more conservative authors in them, yet she referred to models only) is kind of pointless. No girl is going to look at a woman who is conservative, unless she is explicitly stated to be, and think ‘so it’s okay for me to be conservative in my views even if I am a woman? I can be excepted for it’ because you don’t see a woman’s political views. Then again there also already is almost a third of all Americans who are conservative and since political views are a choice they likely wouldn’t be if they weren’t accepted for it, so this representation might not be required for them to be accepted, or maybe it is, I don’t know. In any case the liberal women are also not typically marked as liberals in these magazines, so why should the conservatives be. To be fair, articles might talk about their feminist endeavours but, again, I don’t think it talked about articles that represent a conservative view point in this video and conservative women could also hold feminist views so some of these articles written by or about left leaning women could have just as well been written by right or center political ladies, their political standing would not be apparent from the texts themselves.</p> | Woman | Gender - General | 3/410 | 0.732 |

| <p>Charles Swedenburg I suggest you delete your comment to avoid looking ridiculous. You have the audacity to tell me I need to learn how to read and stop spamming things I don't understand, when you don't even have basic comprehension skills. When did I say " You don't accept trans people,"? I said " You won't accept it," in reference to the study. I said you changed the subject from other people not accepting trans people to their suicide rates, them not accepting themselves has nothing to do with other people accepting them, thus it's a red herring. You're making the active claim that trans people commit suicide because they are mentally ill, thus shifting the burden of proof onto you.</p> <p>I then made the active claim that bullying and discrimination is why they have such high rates of suicide, providing a professional study done by a professional institute that proves you wrong, not some random study anyone can find online. And you can't accept being wrong, you've convinced yourself you're right and you can't change your mind, you need to fit in with what other people think. Therefore, I've proven you wrong and all you've done is admit you don't actually care about facts. Tell me, where is the proof for anything you've said? You haven't given a single fact and you've denied my facts, you're not stupid enough to think a professional study is based on feelings are you? It's factual information obtained by data sampling, basic Secondary School stuff. Therefore, the study is objectively factual. | Charles Swedenburg You do know that hormones or the brain are part of biology, right? So if someone "feels like" a certain gender (brain), it still has to do with biology. And hormones are a very big part of sex (not just gender), so you could say that hormone therapy changes your biological sex . The only thing you can't change are chromosomes - and guess what, they're not always just xy for men and xx for women. Some people have xxy. Some women have xy chromosomes (for example those born with CAIS), and so on.And if you still say gender and sex is a binary because intersex people are exceptions or something: Would you say there's only 3 hair colours (blonde, brown and black), just because less than 2 of the world's population have red hair? | Black, Gender, Red, Sex | Ideological and Political Identity - General, Ethnicity - Black, Ethnicity - Native-American, Gender - General | 9/137 | 6.569 |

| <p>Tay Thoughts If we were discussing purely the origin rather than how it's used today, I'd agree with you. We're not, though. We're talking about the word as it's used now, in the circles i mentioned earlier. It seems odd to use the context of where the word started off without considering how the meaning has changed to reflx the values of today. If we ignore all modern context, the fuckload of leftist philosophy that's come out and carved a niche for itself, and the way that has shaped politics, we would have to assert that modern conservatives are leftists, because, as i said, they are left of absolute monarchists.No one does this. Conservatives don't call themselves leftists, they blame the left for every problem that exists literally ever to make their obsession with preserving all heirarchal and moral values that they advocate for look good. To ignore this fact that exists today because liberalism is left of absolute monarchists just doesn't make sense to me at all.Also, slightly different note, can you like, not misinterpret what I'm saying? You went on this gigantic tangent to imply that I'm asserting that words don't have objective definitions. I'm not saying they don't. I'm saying that context also matters. If you go into the leftist groups i mentioned earlier, liberals are gonna seen as right wing. Left of conservatives in terms of the pursuit of a more egalitarian society but not left of the center (capitalism). The n word is a perfect example of context mattering. Without context, it just means "a black person". With context it becomes either a perjorative due to the systems that reinforce heirarchies which are reaponsible for said hard, or a term of endearment. It fundamentally becomes different in meaning even though the definition stays the same. To answer your hypothetical, i believe that if the systemic constructs that harm people based on race stop being a supported thing, then the n word will no longer cause the harm it did, because the thing that gave it its power would no longer exist except as a historical occurence, which would, incidentally, have to include things like privilege. Kinda hard for there to be privileged whites in a society where constructs and environmental factors no longer reinforce the harmful elements of a word. When this comes to pass, it would probably live on as a term of endearment, because that's a thing that exists now. Or maybe it wouldn't. It really doesn't matter one way or the other. What matters is that the harmful meaning wouldn't have any weight, and would likely cease being relevant.Please, stop pretending that only definition matters when we interpret language. It's dishonest as fuck to misinterpret what someone is arguing in order to defeat that argument instead of the original, and reeks of predatory intent.
